

ENDPOINT MANAGEMENT WORKSHOP

Manage and protect your devices, your apps, and your users

Improve your Microsoft Secure Score with Microsoft Endpoint Manager

“Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities.”

-Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

Learn how to build management policies that protect your users, company data, and devices

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your users' devices are compliant with your IT policies?

Gain insights about your users' endpoints and their compliance with your IT policies

Enable users to be productive, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organisations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

Determine the best way to give your users access to the apps they need on the devices of their choosing

With users wanting increased flexibility in the way that they work, this workshop will show you how to manage both company-owned and user-chosen devices in the cloud.

WHY YOU SHOULD ATTEND

Experience the power of modern device management within your own environment.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

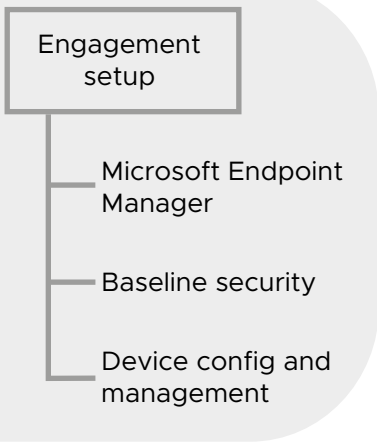

Learn how to improve your management capabilities with Microsoft Endpoint Manager

Discover and protect your endpoints by enforcing policies and deploying security tools

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies

Enable your users to be productive with the applications they need, on the devices they want

WE'LL CUSTOMISE THE WORKSHOP BASED ON YOUR ORGANISATION'S NEEDS

Design and planning

Customer value conversation

Discovery session for endpoints

Key results, recommendations and next steps

WHO SHOULD ATTEND?

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Application business owners
- Chief Information Officer (CIO)
- IT Security
- Chief Security Officer (CSO)
- IT Operations
- Endpoint & Device Management owners/ decision makers
