

HYBRID CLOUD SECURITY WORKSHOP

Get a customised threat & vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system

WORKSHOP HIGHLIGHTS

Discover threats and vulnerabilities in your hybrid environment

Do you have a good understanding of security vulnerabilities in your hybrid and multi-cloud environment? Including VMs, databases, Azure storage and more? Are you aware of the number of suspected authentication activities across your multi-cloud environment? Ultimately, are you confident about the cloud security posture of your organisation?

Learn how to prioritise and mitigate potential threats to your servers and services

Improve your cloud security posture with a Microsoft Hybrid Cloud Security Workshop

Understand what can be done to reduce the attack surface area for hybrid workloads

Organisations today have increased usage of cloud services to manage a growing volume of data while dealing with tight budgets and vulnerable legacy systems. As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your broader security objectives — and identify current and real threats — by scheduling a Microsoft Hybrid Security Workshop.

Learn about benefits and capabilities of Azure Defender and Azure Network Security

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments. Plus, clarity and support on how to improve your security posture for the long term.

Develop defined next steps based on your needs and objectives

WHY YOU SHOULD ATTEND

Given the volume and complexity of identities, data, apps, endpoints, and infrastructure, it's essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing risks to your cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest tools

WHAT TO EXPECT

During this workshop, we'll partner with you to strengthen your organisation's approach to hybrid cloud security. We'll help you better understand how to prioritise and mitigate potential attacks.

-  **Analyse** your requirements and priorities for a hybrid cloud security detection and response solution
-  **Define Scope** & deploy Azure Defender in the production environment, onboarding servers and other selected services
-  **Explore** Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment
-  **Discover** existing hybrid workload vulnerabilities and learn how to reduce the attack surface area
-  **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats
-  **Recommend** next steps on proceeding with a production deployment of Azure Defender and Azure Network Security

WHO SHOULD ATTEND?

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Data Governance Officer
- Chief Information Officer (CIO)
- IT Security, IT Compliance, and/or IT Operations
- Chief Security Officer (CSO)
- Data Governance
- Data Protection Officer
