AZURE CLOUD STRATEGY AND VISION

Driving your move to the cloud

Deciding to move to the cloud is a big business decision, but without a defined strategy and vision, your cloud adoption could fall at the first hurdle.

By defining a clear cloud strategy and vision, you ensure that all business and technical stakeholders are aligned, while giving key members of the team something concrete to work with. Once you've created a strategy and vision, it can be referenced and applied throughout the stages of your journey to the cloud to make sure everyone stays on the same page.

During our workshop, we will work with your stakeholders using Microsoft's Cloud Adoption Framework to identify:

DEFINE STRATEGY → PLAN → READY → ADOPT

GOVERN ← MANAGE

> **Cloud motivations**
> We help you identify and classify the motivational factors that are driving you towards cloud adoption.

> **Business outcomes**
> We help you identify and focus on the outcomes that make a cloud migration successful.

> **Business justifications**
> We help you understand how to justify cloud adoption to business stakeholders.

> **Planning**
> We look ahead at factors to consider as you enter the planning stage of your cloud journey.

THE MODALITY WAY

With over 20 years of experience designing, delivering, and operating global technology projects and solutions, we know that adopting the right cloud strategy for your business takes time and a tailored approach.

We work alongside your dedicated teams to define and adopt a cloud strategy that captures the motivations and desired business outcomes that are driving your move to the cloud. With expertise in all areas of the cloud life cycle, let us help you create a strategy and vision that puts your business on the path to cloud success.

KEY FEATURES

Ensure your cloud adoption strategy is geared up for success

Azure Best Practice
We apply our five pillars of Azure Best Practice to everything we do, giving you peace of mind and ensuring you get the most from your projects.

Expertise
We bring our experience from the complete cloud life cycle and our expertise in planning, building, migrating, and running cloud solutions to help you develop your strategy.

Recommendations
Throughout the workshop, we will document our findings and make recommendations to further develop your cloud strategy and vision. Our report will be written in a way that allows you to share them between business and technical stakeholders.

REQUEST AN AZURE LANDING ZONE CONSULTATION

The cloud is vital for helping businesses reinvent themselves and continue to scale as appropriate. Whatever your needs, our data-driven proven approach supports the design and deployment of a landing zone to complement your business strategy.
