M365 REVIEW WORKSHOP

Making the most of your investment

Microsoft 365 comes with a wide range of workloads within the various subscriptions and many companies are simply not making the most of this investment. Perhaps that's by using 3rd party tools for functionality that already exists, or maybe you don't have the time or in-house expertise to understand the various capabilities of your subscription.

With this workshop we will **discover**, **strategise** and **implement** areas from your Microsoft 365 subscription and license workloads that have not yet been adopted. We will concentrate on three main areas:

Security
Microsoft 365 licensing and subscriptions come with a whole host of security features which are often overlooked, such as Mobile Device Management, Advanced Threat Protection or Conditional Access Polices. Let us investigate what you're potentially missing out on.

Collaboration
Microsoft 365 workloads have a vast number of collaboration options, including Teams, Yammer and SharePoint. We can get rich information on your usage of these tools and ensure you're getting the most from them.

Productivity
We can gain insights into how your organisation uses M365 and the experiences that support it, with metrics and recommendations for both people experiences and technology experiences - ultimately making your organisation more productive.

WORKSHOP FRAMEWORK

Discovery

Engage in an environmental and workload analysis

Define existing and desired workload scenarios

Understand your IT goals and business drivers

Strategy

Identify potential blockers and challenges

Provide a list of actionable recommendations to get the most from your licencing

Implementation

Develop a joint action plan based on key results, recommendations and next steps

Work with us to maximise your M365 experience

WHO SHOULD ATTEND?

The workshop is intended for key stakeholders and decision makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Chief Technology Officer (CTO)
- Application business owners
- IT Security
- IT Operations
- Security Architects
- Security Engineers
