

MICROSOFT TEAMS AUDIT

DISCOVER THE TRUTH ABOUT HOW PEOPLE ARE USING TEAMS -
QUANTIFY RISK, ASSESS USAGE AND PROMOTE EFFECTIVE ADOPTION

ARE YOU GETTING THE MOST OUT OF YOUR MICROSOFT TEAMS INVESTMENT?

Microsoft Teams plays an essential role in keeping your business running smoothly and productively. It facilitates collaboration and communication, and is the ideal tool for joined-up working, whatever your organisational model.

However, Teams doesn't run itself. Whether you've taken a controlled or organic approach to your roll-out, you'll want to know how Microsoft Teams is being used and if your data is safe and secure.

ASSESS YOUR PRIORITIES, IMPROVE THE USER EXPERIENCE

Modality's Microsoft Teams Audit reviews key data on configuration, adoption, governance and the quality of your Teams call and meeting experiences – providing vital insight to the overall health, compliance and productivity of your Microsoft Teams environment.

SURFACING THE INSIGHTS

Your Microsoft Teams Audit will deliver:

- Red, Amber and Green (RAG) status report for key metrics, with expert commentary and recommendations from Microsoft Teams specialists
 - Adoption and Usage
 - Security and Compliance
 - Call and Meeting Experiences
 - Configuration
- Presentation summary of report findings
- Online meeting to discuss findings and recommendations

Armed with this data and advice, you'll know where to concentrate your efforts to remove any risk or performance issues, and maximise your investment in Microsoft Teams.

MICROSOFT TEAMS AUDIT

BENEFITS

- ✓ Transparency for stakeholders
- ✓ Provides status of collaboration, network reliability and governance threats
- ✓ Highlights potential risks/weaknesses/deficiencies
- ✓ Quantifies usage of all key Teams activities
- ✓ Recommends priority actions to aid decision-making
- ✓ Establishes a baseline for growth and improvement

Our experts will audit your Teams data, knowing the role each statistic plays and why it matters. Able to see the good practises as well as areas you can improve, our Microsoft Teams specialists will articulate for you the true business impact of a well-run Teams operation, and advise on the best corrective actions to put in place to achieve this.

Armed with information from a Microsoft Teams Audit, you can take steps to:

DRIVE POSITIVE CHANGE

Understand pain points and empower users with the tools and training materials to succeed

IDENTIFY AND ELIMINATE RISK

Focus your efforts on prioritised risk areas, educate users on threat awareness and prevention

IMPROVE USER EXPERIENCE

Share high-value use cases, showcase Teams best practice with practical examples

INCREASE ROI

Centralise activity in Teams; reduce time wasted on emails, document versions and finding the right team to join
