

## SECURITY MANAGED SERVICES

Effectively secure your digital landscapes to ensure governance and compliance, whilst highlighting your security position at any given time

### ENSURING SECURITY ACROSS YOUR DIGITAL LANDSCAPE

Cloud technology has transformed the way organisations operate; embracing new opportunities to connect with customers, empower remote workforces and optimise day-to-day operations. But alongside the opportunities, the reduction of traditional IT boundaries has presented new security challenges.

A third of successful enterprise attacks are on Shadow IT resources, and only 26% of European companies say that they are GDPR compliant. As workers bring devices, apps, and information to work, organisations must find solutions to ensure security across their digital platforms without impacting business productivity.

### SECURE YOUR MICROSOFT INVESTMENT THROUGH INDUSTRY-LEADING EXPERTISE

The Microsoft security and compliance landscape can be complex - including multiple configurations, dashboards, and audit logs - all of which are essential components for ensuring security and compliance. Modality can reduce this complexity by delivering security solutions that help guide your strategy and future-proof your defences.

As a recognised global leader and award-winning Microsoft Partner, you'll benefit from Modality's 14 years of experience providing best practice advice and guidance, as well as security health checks and monthly reviews to ensure your critical data and systems are properly protected in Microsoft 365 and Azure.

### WHAT'S IN IT FOR ME?

Our Security Managed Services ensure your security and governance position remains uncompromised, with three core propositions:

#### M365 Security Setup and Review

- Initial security health check and audit
- Baseline configuration with core M365 security tools
- 3x monthly security reviews

**Security Assurance Service**

- Deep dive security analytics
- Key security events and mitigations
- Security improvement options
- Advanced Microsoft capabilities
- Review of existing configuration, highlighting trends and areas of risk
- Implementation of recommendations with configuration days

**Microsoft Security as a Service**

- 24/7 Security Incident and Event Management via Azure Sentinel
- Continuous optimisation and tuning to maximise threat detection
- IT service desk integration
- Immediate response to threats with automated playbooks
- Monthly Security Assurance reviews
- Options for 3rd party data management and device remediation
- Option for phishing and anti-malware training

**WHY MODALITY?**

When it comes to security and compliance, you need an experienced partner.

As a cloud-first, leading Microsoft partner, we help thousands of Public and Private Sector organisations globally to optimise their business with Microsoft technology. Enhanced by world-class consulting, in-house developed software, and Managed Services, we provide outstanding customer experiences and ongoing success. We don't just deliver Microsoft services, we prescribe a unique Secure By Design and data driven approach ensuring that adoption, security and compliance can be measured and, crucially, reported on to track ROI.

**Wherever you are on your Microsoft journey, we'd love to hear from you.**
